

A new on-line tool helps training on stone placing

Stone Placing is a new project funded by the European Union that seeks to strengthen **knowledge on handling and placement of natural stone** and convert it into a more qualified profession.

Stone Placing is a completely **free on-line course** that aims to increase the capacity of workers in laying natural stone in order to ensure the quality of the final work and safety of workers. **All content is available for free on its own website**

Two types of materials have been developed: On the one hand, there is a "**Curriculum**" on working stone effectively and safely. This is available on the website in text format. But the star of the project is undoubtedly the "**Resource Center**". An extensive catalog of practical demonstrations on a variety of specific topics related to the placement of the stone elements. The explanations are made **through multimedia material**. It contains the necessary tools, recommendations and an animation per each product which shows the process of placement for a better understanding of the building process. In total, **over 20 animations** that sought to clarify the most common doubts when handling natural stone.

Stone Placing is a **project funded by the European Union** under the "Leonardo Da Vinci" program. It is sponsored by the **German Natural Stone Placing Association** and its development has involved agencies and companies related to the field of stone from **Spain, France, Sweden, Croatia and Romania**.
